EVOLENCE®

a naturally younger -looking you

www.knightdermatology.com

The Knight Dermatology Institute is proud to offer the latest in injectable sciences, EVOLENCE®, to its patients. EVOLENCE® is an advanced collagen-based dermal filler that provides dramatic and long-lasting correction of moderate to deep facial wrinkles and folds.

By replacing lost collagen with an advanced collagen compound, EVOLENCE® dermal filler can help enhance and maintain the structure, volume, and naturally younger-looking appearance of your skin. EVOLENCE® integrates beautifully with your natural collagen and provides a vibrant look and feel that lasts. These immediate results last for at least 6 months, so patients can avoid the costly repeat treatments often associated with other fillers.

Dr. J. Matthew Knight is part of the OrthoNeutrogena EVOLENCE® STAR™ Faculty Team which means he has received specialized training in the use of EVOLENCE® and has become a national EVOLENCE® physician trainer, training other plastic

surgeons and cosmetic dermatologists throughout the US.

At The Knight Dermatology Institute, Dr. Knight and his staff have the ability to meet the unique needs of each and every patient with a plethora of services. Having now added the ground-breaking EVOLENCE® fillers to his repertoire, Dr. Knight's patients are leaving his office even more refreshed and vibrant looking than ever before.

The Knight Dermatology Institute has also begun to offer the latest in fractionated laser technology. Considered the "gold standard" device for resurfacing of the skin, the Lumenis FX™ Fractional CO2™ laser corrects wrinkles, laxity, scars, and pigment problems in a more comprehensive and considerably more effective way than ever thought possible before. Innovative and comprehensive, The Knight Dermatology Institute consistently raises the bar and sets new standards for dermatological care in Central Florida.
